

**Agenda item 11.3**

**Other technical items for information and approval**

## 1 High priority publications

The following criteria have been established for the prioritisation of OIML publications and projects.

	Criteria	Comments
1	Recommendations with relevance to OIML-CS	Based on number of certificates issued in the past
2	Publications where we expect “demand” in the future:	Based on: <ul style="list-style-type: none"> <li>• Needs of society,</li> <li>• Needs of Member States,</li> <li>• Needs of manufacturers (e.g. demand for certificates),</li> <li>• Needs of CEEMS</li> </ul>
3	Generic documents that cover a wide range of instruments	e.g. OIML D 11 and OIML D 31
4	Publications with relevance to the organization	e.g. B 6, D 30 and Vocabularies
5	Publications with relevance to RLMOs	e.g. those used for Normative Documents in the EU

Using the criteria established above, the following high-priority publications have been identified.

*Note 1:* The list below is in alphabetical and numerical order rather than a specific order of priority.

*Note 2:* The current status of each publication is shown in the brackets [ ].

- B 6 *Directives for OIML technical work* [Project proposal to revise B 6 approved by the 57th CIML Meeting, and Final Draft revision submitted to the 58th CIML Meeting for approval]
- D 11 *General requirements for measuring instruments - Environmental conditions* [Project proposal to revise D 11 approved by the 57th CIML Meeting, 1WD has been distributed to the PG for comment, two PG meetings held to discuss the responses to the submitted comments]
- D 31 *General requirements for software controlled measuring instruments* [Final Draft revision submitted to the 58th CIML Meeting for approval, as well as a project proposal for further revision]
- R 46 *Active electrical energy meters* [PC agreed to add to the list of high priority publications. Active revision project]
- R 49 *Water meters for cold potable water and hot water* [Active revision project]
- R 51 *Automatic catchweighing instruments* [Active revision project]
- R 60 *Metrological regulation for load cells* [Latest edition published in 2021]
- R 76 *Non-automatic weighing instruments* [Active revision project – convenership recently changed from France/Germany to the BIML, 1CD distributed in July 2023, 2CD expected December 2023]
- R 91 *Radar equipment for the measurement of the speed of vehicles* [Active revision project]
- R 117 *Dynamic measuring systems for liquids other than water* [Latest edition published in 2019 so a periodic review is to be conducted]

- R 137 *Gas meters* [Active revision project]  
R 139 *Compressed gaseous fuel measuring systems for vehicles* [Reconfirmed 2022]

## 2 High priority projects

The current list of high-priority projects (approved at the 57th CIML Meeting) is as follows:

TC 5/SC 2/p 4	D 31	<i>General requirements for software controlled measuring instruments</i>
TC 10/p 1	R 23	<i>Tire pressure gauges for motor vehicles</i>
TC 12/p 1	R 46	<i>Electricity meters</i>
TC 12/p 3	R xxx	<i>Electric Vehicle Supply Equipment (EVSE)– New Recommendation developed from G 22</i>
TC 9/SC 1/p 1	R 76	<i>Non-automatic weighing instruments</i>
TC 6/p 6	R 87	<i>Prepackage template</i>
TC 7/SC 4/p 3	R 91	<i>Radar equipment for the measurement of the speed of vehicles</i>
TC 16/SC 1/p 4	R xxx	<i>Instruments for measuring the vehicle exhaust soot particle (new Recommendation)</i>
TC 9/SC 2/p 11	R 134	<i>Automatic instruments for weighing road vehicles in motion and measuring axle loads</i>

### Project status

The status and history of all these high priority projects is given in Annex A to this Addendum.

## 3 Recommendation

The CIML is asked to approve the above lists of the current high-priority publications and projects.

## 4 Information on particular items of technical work

### TC 3/SC 4/p 2

#### **New Document: *Surveillance of utility meters in service on the basis of sampling inspections***

During 2023, the UK stated that it wished to give up the convenership of this project due to changed national priorities. The BIML conducted an enquiry amongst members of the Project Group, and no P-members volunteered to take it on. It is therefore recommended that the CIML cancels this project.

**TC 9/SC 1/p 1**

**Revision of R 76:2006 *Non-automatic weighing instruments***

The situation regarding the slow progress of the project to revise R 76:2006 was discussed at the Presidential Council in March 2023. A roadmap for the completion of the project by 2024 was drafted and put forward to the conveners, who felt unable to comply with the proposed timescales. Following further discussions by the Presidential Board, the convenership has been transferred, at least temporarily, to the BIML. A 1CD revision was circulated for comment to the Project Group in July 2023, and the 2CD is expected in December. It is hoped that a Final Draft revision can be put forward to the CIML for approval at its meeting in October 2024.

**TC 9/SC 2/p 11**

**Revision of R 134:2006 *Automatic instruments for weighing road vehicles in motion and measuring axle loads***

The UK also indicated that it wished to give up the convenership of this project due to changed national priorities. The BIML conducted an enquiry amongst members of the Project Group, and one P-member volunteered to take it on. A vote amongst P-members of TC 9/SC 2/p 11 will now be carried out to approve this Member State as the new convener.

**Annex A**

**Status and history of high priority projects**

**as at 2023-10-14**

---	--	---

**Is anything preventing you from making progress with this project within the timelines in B 6?**

Currently we don't see any issues. The decision from BIML to appoint another convener, helped to solve issues from 2018 and 2019. The work load is now shared between Slovenia and Switzerland and comments are processed regularly on weekly basis.

**Is there anything the BIML can do to help in accelerating the work?**

Organising a web meeting if we found that we need to organise it.

**2020 achieved:**

2WD of Part 1 [Requirements], Part 2 [Test procedures] posted 2020-10-15 for comment by 2021-01-15

**2020 planned:**

APRIL: issued 2WD

MAY: collect and compiling responses

SEPTEMBER: meeting (to be decided)

OCTOBER: 1CD

**Is anything preventing you from making progress with this project within the timelines in B 6?**

1. a lot of responses, which have to be cross checked between p members
2. technical difference between p members
3. personal problem: time allocation for OIML activities
4. personal problem: I am not in the position to delegate or ask some tasks to p members to participate

**Is there anything the BIML can do to help in accelerating the work?**

1. Is there possibility to get co-convenors to take some workload?
2. Is it possible to get contact from Belgium, who offered possibility to organise meeting?

**2019 achieved:**

MAY 2019: issuing 2nd version WD based on the outcome of 2013, 2014 meetings and votings,

SEPTEMBER 2019: collecting and compiling responses

**2019 planned:**

- MAY 2019: issuing 2nd version WD based on the outcome of 2013, 2014 meetings and votings,
- SEPTEMBER 2019: collecting and compiling responses
- NOVEMBER 2019: 1CD

**2018 achieved:**

None of the announced activities

**2018 planned:**

- APRIL 2018: issuing 2nd version WD based on the outcome of 2013, 2014 meetings and votings,
- SEPTEMBER 2018: collecting and compiling responses
- NOVEMBER 2018: 1CD
- Meeting in 2019 if still unresolved issues

A demanding schedule was coordinated. Subgroups “verification” and “use cases” were put on “stand by” as no leading country or organization could be identified. The other subgroups were subsequently very active. Several online meetings of the subgroups took place.</li> <li>• Unfortunately, almost all active participants reported a high workload, which is why the coordinated schedule could not be kept.</li> <li>• Another online meeting of the entire project group is planned for early summer 2023.</li> </ul> <p><b>2022 planned:</b></p> <ul style="list-style-type: none"> <li>• A webmeeting will be organised on 2022-03-28 to inform all members on the work realised by the subgroups and the next steps.</li> <li>• A 2WD based on the current content reorganised according to the new structure will be published.</li> </ul> <p><b>Is anything preventing you from making progress with this project within the timelines in B 6?</b></p> <p><b>Is there anything the BIML can do to help in accelerating the work?</b></p> <p><b>2021 achieved:</b></p> <ul style="list-style-type: none"> <li>• A webmeeting was organised by the convenors on 2021-02-18 with 26 participating countries. During this webmeeting a proposed structure for parts 1 and 2 was been shared with PG members and a possible strategy how to proceed was drafted. Members were invited to send comments and questions by the end of March 2021. There was general support even though some doubts about the timely realisation were remarked. A general discussion with some CIML members about the future of the project in May 2021 led to the decision to proceed with the restructure of the current OIML R 76 even if it is a huge task. This challenge and the need of support by all project group members for reaching the goals was discussed at a webmeeting in October 2021. There the sub-groups were reorganised and a stronger focus on the timeline announced.</li> <li>• Subgroups dealing with general structure, software and modules are active. The subgroup in charge of</li> </ul>

		<p>software did work to align software requirements with D 31 and the subgroups in charge of modules and general structure worked on the reorganisation of the current revision according to the new structure accepted during the meeting of October 2021.</p> <ul style="list-style-type: none"> <li>• No leader has been found for the subgroup in charge of specific use cases. The leader of the subgroup dealing with verification is now retired and the subgroup waits for colleagues of the CEEMS countries to take into account their need appropriately in the project group</li> </ul> <p><b>2021 planned:</b></p> <p>The initiated work highlighted questions on the structure of the Recommendation. The conveners thought it was necessary and reasonable to inform members of the project group about these ideas in order to have their feedback on the means to proceed. For these reason, a webmeeting was organised on 2021-02-18. During this webmeeting with 26 participating countries, a proposed structure for parts 1 and 2 was shared with members and a possible strategy how to proceed was drafted. Members were asked to send their comments and questions by the end of March. A further webmeeting will be organised in April or May 2021 to finalise and agree upon the structure of part 1 and 2 of R 76. This will have consequences even for the other intended parts of the Recommendation. The adaption of technical changes will be on the agenda of 2022.</p> <p>During the February 2021 webmeeting, the need for a new part 5 dealing with verification for CEEMS was highlighted. The need to separate this work in another project has been identified, and the objective is to prepare this new part over the next 18 months. The project group dedicated to this topic will support this work, and it is proposed to include colleagues of the CEEMS countries to take into account their need appropriately in the project group.</p> <p><b>Is anything preventing you from making progress with this project within the timelines in B 6?</b></p> <p><b>Is there anything the BIML can do to help in accelerating the work?</b></p> <p>Nothing suggested or requested</p> <p><b>2020 achieved:</b></p> <p>During the discussions on what information should be moved to which part of the Recommendation in the 1WD, it came out that the content of R 76 in its current form does not focus on the state of the art of new non-automatic weighing instruments and their type approval. As R 76 has been developed over a long time, the idea to change and restructure R 76 according to modern techniques and to concentrate on today's needs seems important. Starting from the viewpoint of type evaluation of a modern non-automatic weighing instrument, the requirements of R 76 should cover electronics and software on a fundamental basis rather than via annexes, which would cause changes in the structure and the content of R 76. The 1WD of part 1 posted on Workspace (on 2020-07-24 for comments by 2020-10-23) is a first step in adapting the structure to current NAWIs. The modular approach - already part of the current R 76 and particularly described in the framework of OIML-CS, will need more guidance in the Recommendation. That is why, in parallel, the conveners work to create a chapter dealing with modular approach inside part 1.</p> <p><b>Is anything preventing you from making progress with this project within the timelines in B 6?</b></p> <p><b>Is there anything the BIML can do to help in accelerating the work?</b></p> <p>The revision of R 76 has been organised in subgroups. In 2019 the convener of one subgroup has been retired so the respective tasks were transferred to the secretariat. So, the secretariat was not able to prepare the first WD1 in time (end 2019).</p>
--	--	---

A draft for the new part 5 dealing with verification, is at an advanced stage of development. When the draft is accepted by the project group it could probably be improved by a detailed discussion with the members of the CEEMS community. For this discussion some help of BIML will be requested in order to organise either a meeting with some CEEMS representatives or a consultation of the CEEMS community on this subject.

**2019 achieved:**

The secretariat prepared first drafts of new parts of R76 according to OIML B6, i.e. the information of the two existing parts was divided into 4 parts (all parts except the evaluation report format). The secretariat has also reviewed all the comments made by the members before our first meeting in Braunschweig and the first working draft of parts 1 and 2 will integrate some of these comments.

Revision of R76 is done by subgroups:

- Structure, Terms & Definitions: the work of this subgroup has been done by the secretariat because the convener of this subgroup is retired. The working draft has been aligned with D11, VIM, VIML, R60, B6.
- Modular Approach: a questionnaire has been sent to all members to identify needs, experiences and expects concerning the modular approach within the recommendation OIML R76.
- Software: a project of the part dealing with metrological and technical requirements has been written and this project is now in a consolidation phase
- Harmonisation with other documents: the work on this topic has been done by the secretariat
- Verification: a project part has been prepared by the subgroup.

During the discussions on what information should be moved to which part of the recommendation it came out, that the content of R 76 in its current form does not focus on the state of the art of new non-automatic weighing instruments and its type approval. As R 76 has been developed over a long time, the idea to change and restructure R 76 according to nowadays techniques and to concentrate on today's needs seems important. This would cause extensive changes in the structure and the content of R 76 and relates to some parts of the recommendation. A concept is discussed and developed on a secretary meeting in September 2019 in Paris and will be the base for WD. European manufacturer association CECIP agreed with the idea of this restructuring of R 76 well knowing that this concept contradict to a fast revision of the current R 76.

**2019 planned:**

A first WD will be prepared until the end of 2019.

During the discussions the question arose, if the modular approach should be covered by a more general paper in OIML (possibly even in OIML CS) too. The technical details must be incorporated into the specific recommendation, here R76, anyway. But a general statement about how to handle this aspect for other instruments too is missed.

**2018 achieved:**

The main aspects of the revision were discussed with the representatives attending the meeting in 12/2017. It was identified, that R 76 has to be updated concerning the aspects of:

Terms and Definitions, the practical handling of the Modular approach in OIML, an update of the Software requirements, Harmonisation with other OIML documents (for instance new EMC requirements) and finally the aspects of Verification (new part 4). Five sub-groups have been created in 2018. In the software area an update of the current R 76 on the basis of the new version of D 31 is in discussion and on its way.

Publication	Project Convener	History and current status
		<p>The Subgroup, handling the specific aspects of verification is as well in good activity. A pool of information about the verification processes in different countries was established and is under discussion.</p> <p>The other fields of activity are up to now limited to bidirectional discussions.</p> <p>Unfortunately, no document was prepared in 2018.</p> <p><b>2018 planned:</b></p> <ul style="list-style-type: none"> <li>• Discussions of the aspects within the sub-groups</li> <li>• Delivery of respective supporting texts</li> <li>• Preparation of a first working draft and collection of comments.</li> </ul> <p><b>2017 achieved:</b></p> <p>Attendees of the PG meeting discussed and decided about the main aspects within the revision of R 76:</p> <ul style="list-style-type: none"> <li>• Structure, Terms &amp; Definitions</li> <li>• Modular Approach</li> <li>• Software</li> <li>• Harmonisation with other documents</li> <li>• Verification</li> </ul> <p>Respective Sub-Groups were defined.</p> <p><b>2017 planned:</b></p> <p>Summarise main aspects for a revision and start to collect respective information;          Prepare a draft version of the revised R 76          Meeting to be held in the second half of 2017 for the discussion of Working Draft of a revised R 76</p> <p><b>2016 achieved:</b></p> <p>Project approved by 51st CIML Meeting, October 2016</p>

The same actions as for 2021 are therefore carried forward and will be achieved through online collaboration and/or in-person meetings if the possibility arises.</li> </ul> <p><b>2021 planned:</b></p> <ul style="list-style-type: none"> <li>• Clarify existing WDs</li> <li>• Conduct any necessary voting on WDs by end of March 2021</li> <li>• Produce 1CD by end of June 2021</li> <li>• Produce 2CD by end of 2021</li> </ul> <p>An online meeting will be organised by the BIML if this is considered necessary once the current state of the project has been established. It is necessary.</p> <p><b>Is anything preventing you from making progress with this project within the timelines in B 6?</b></p> <p><b>Is there anything the BIML can do to help in accelerating the work?</b></p> <p>Change of co-convenership will help with progress. Kenya had staff constraints in the Division that affected progress. Situation has improved, hence co-convenor is now more focused on the project. Technical input to be</p>

provided by Kenya, with editorial work and processes handled by the BIML.

**2020 achieved:**

Netherlands stood down from co-convenership in October 2020  
Current documents posted to the Workspace for continuation of future work.

**2020 planned:**

Finish editing Part 1 2WD  
Publish Part 1 2WD for comment  
Collect comments Part 1 WD2  
Finish Part 2 1WD  
Publish Part 2 1WD for comment  
Collect comments Part 2 1WD  
Work on Part 3 1WD  
Publish Part 3 1WD for comment  
Collect comments Part 3 1WD  
Create 1CD and comparison table  
Publish 1CD

**Is anything preventing you from making progress with this project within the timelines in B 6?**

**Is there anything the BIML can do to help in accelerating the work?**

2019 budget for OIML was low and prevented progress. 2020 budget is sufficient. Progress within B 6 timelines should be possible

Answer comments where convener response is “Check with BIML”

**2019 achieved:**

Comments collected and convener response added.  
Uploaded on OIML website 2020-02-13  
First editing on WD2 of Part 1 and WD1 of Part 2

**2019 planned:**

To collect comments on 1WD and after reviewing use the comments to create a 2WD or 1CD  
Work on Part 2 of the Recommendation  
Start work on Part 3 (Report format)

**2018 achieved:**

To complete the Working Draft;  
To publish the first Working draft on the OIML website for comments (posted 2019-01-17, deadline 2019-04-17)

**2018 planned:**

To complete the Working Draft;  
To publish the first Working draft on the OIML website for comments.

**2017 achieved:**

Publication	Project Convener	History and current status
		<p>A number of items have been added to the Working Draft based on prEN 12645</p> <p><b>2017 planned:</b> Creating first working draft 1WD out for comments by end 2017.</p> <p><b>2016 achieved:</b> Documents exchanged with explanation</p> <p><b>2016 planned:</b> The co-convenership will be followed up so that progress can be made on the revision.</p> <p><b>2015 achieved:</b> Due to the need for progress on this project in several African countries, the possibility of a co-convenership with Kenya was discussed at the CIML Meeting in Arcachon.</p> <p><b>2015 planned:</b> Final draft of EN12645 Tyre pressure measuring instruments to be sent to project group members as a possible basis and first WD for the revision of OIML R 23.
