

# CECIP Report CIML 2023

CIML meeting, Thailand  
October 2023

- First ICW 2023 great success!
  - Theme of the conference "Digitalization in a global digital world"
  - 220 participants from 6 continents
  - Very good response on organisation and programme from participants
  - In cooperation with OIML and BIPM
    - Much appreciated by global weighing industry

- Several presentations on OIML work:
  - Session on digital transformation of OIML work including developments on OIML DTG, R76, R51 and D31
  - Presentation on OIML R134
- International cooperation among manufacturer associations from Japan, US, China, Australia, Argentina, Brazil India and South Korea.
- Full programme [here](#)
- Next edition ICW 2026 in Japan!

- CECIP published its new vision on the metrological control of the future ([Link](#))
  - Hopes to start discussion on making legal metrology framework futureproof
- Key topics:
  - Harmonisation of reverification system (mainly within EU)
  - Reverifications with partly remote tests
  - A risk-based approach for reverification periods
  - European weighing instrument database
  - Taking into account new business models when preparing legislation, standards and recommendations
  - Effective market surveillance
  - Independent reverifications not only by government bodies

- CECIP ran the ‘Weighing you can trust’ campaign
  - Successor of ‘World with Weighing’
  - Articles, website ([www.worldwithweighing.com](http://www.worldwithweighing.com)) and social media posts
- Focused on raising awareness of different quality aspects of weighing

- CECIP is actively involved in following revisions and working groups:
  - OIML R76 – Non-automatic weighing instruments
  - OIML R134 – Weighing in motion
  - OIML R51 – Checkweighers
  - OIML D31 – Software
  - OIML D11 – Electronic measuring instruments
  - OIML CS MC
  - OIML Digitalisation Task Group
  - OIML R106 – Automatic rail-weighbridges

**Thank you!**

Luis Cachón  
President of CECIP
